SABPA reminds all growers to adhere to good agricultural practices with regards to bees and pollination! Follow the link for the Pollination Services Charter [www.croplife.co.za/images/croplife/home/POLLINATIONSERVICESCHARTER.pdf](http://www.croplife.co.za/images/croplife/home/POLLINATIONSERVICESCHARTER.pdf)

Next Board Meeting and AGM:  
**27 August 2018**

## Market Access Issues

The USA is open for blueberry exports. If you want to export to this country you need to do the following:

- Register your blocks online on DAFF website
- Make sure your fruit undergo cold steri of 14 days at 1.1°C either in RSA or USA.
- If you rather want to irradiate your fruit and not do cold steri- you can do that in Mississippi, USA.
- Fumigation with Methyl Bromide is not advised.
- Contact your exporter for more information!

5-7 September 2018
